

**International
Collaborative
for Best Care
for the Dying Person**

Welcome to register as a sponsor to the 11th Annual conference of the "International collaborative for best care of the dying person", **17-18 november 2026 in Lund, Sweden.**

This two-day event will be hosted by the Institute for Palliative Care at Lund University and Region Skåne.

The main objective of the International Collaborative is to promote high-quality care for the dying person through international research, education, and teaching collaborations, as well as to strengthen cooperation with the EAPC Task Force on Care for the Dying. The clinical objectives include supporting the development of the International Collaborative 10/40 Model for Best Care for the Dying Person.

The programme will appeal to physicians, nurses, allied health professionals, researchers, and others working in or interested in end-of-life care. Participants may attend either or both days.

The programme is designed to foster learning, interaction, and professional relationships, and to share and discuss the work of the Collaborative.

With its focus on best care for the dying person from multiple perspectives and its intimate conference format, this event offers a unique opportunity for international learning and networking.

We look forward to welcoming you to Lund in November 2026. More details about the programme, registration, and speakers will be available soon.

Warm regards,
The Organising Committee
